

HYPERFILM

PAINT PROTECTION SYSTEM

Powered by

HYPERLAYER

Hyper Protection.

Hyperfilm Paint Protection Film is the superior way to protect and enhance your vehicle, with a proprietary formula that provides unmatched protection from extreme temperatures, UV rays and other environmental factors. Hyperfilm PPF is the world's first paint protection film with an industry-leading multilayer TPU structure that stretches to accommodate intricate lines, making it possible to protect the paint at tight spots as well. At the same time, this technology provides a better effect and greater durability for the vehicle compared to other systems in the market.

Cutting-edge Films designed for Superior protection.

Our high-performance films are crafted from advanced polyurethane, offering remarkable scratch resistance, self-healing capabilities, and a flawless visual finish, all while remaining virtually invisible.

TOP-COAT LAYER

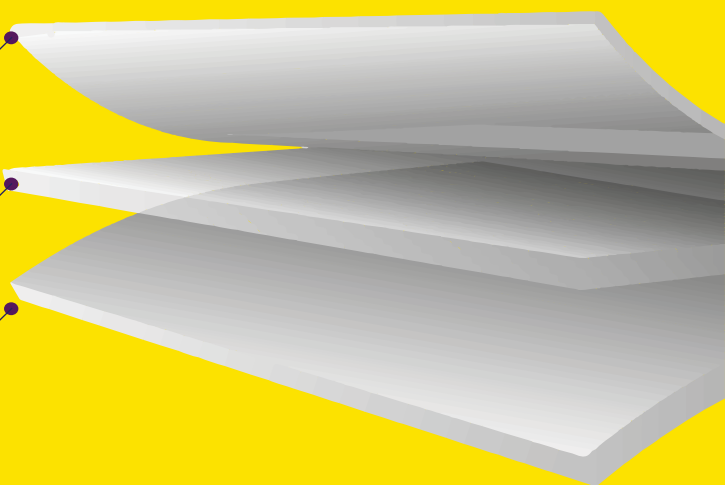

The initial line of defense, exquisitely designed for self-healing

CORE LAYER

Polyurethane creates a sturdy, flexible base for a consistent appearance and lasting impact resistance.

ADHESIVE LAYER

Forms a protective and reliable bond with your bodywork.

Supreme Perfection.

Self Healing / Hot Healing

The films can endure levels of abrasion that can recover with gentle warming, to restore the high quality glossy finish.

Non-Yellowing

UV resistant, ensuring long lasting optical clarity and a near invisible protection layer to the vehicle.

Enhanced Finish

With ultra high gloss Hyperfilm not only protects but also enhances.

Hydrophobic

Water is repelled at a far greater rate than is achieved on OEM paintwork.

Ease Of Handling

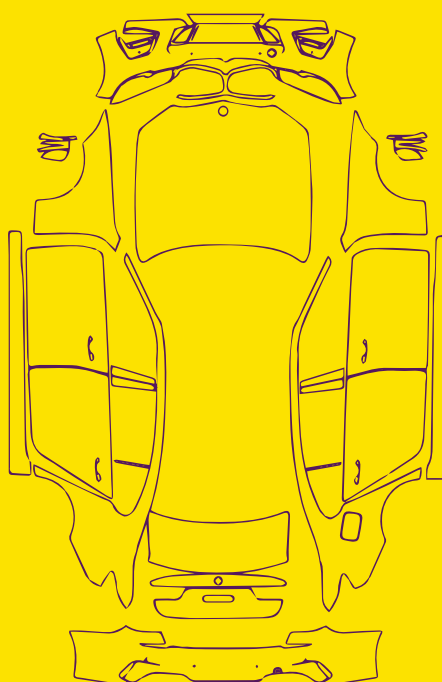

Easy to reposition. Tacks when you need it

Ultimate Protection

Offers protection against stains, stone chips, insects or bird droppings.

Hyperfilm Advanced Pre-Cut System

Pre-cut system is the advanced solution for the PPF application industry. It eliminates the unnecessary damage of cutting PPF on vehicles and accidentally cut through the paint clear coats. Pre-cut also eliminates the need of removing body panels. also it stops at 0.22cm from the edge, this will prevent lifting or peeling up.
